STATA COMMANDS FOR QOG DATA

We have a rather large and engaged group of users of the QoG datasets that use Stata. Some of them have written Stata commands specifically for the use of QoG Data. These commands can be used to automatically open the latest available version of any of the QoG datasets, merge your own data with QoG data, or open the correct codebook for the QoG data you're using. You can find more information about the commands and installation instructions at the [Stata section](#) of our website.

Best regards,
The QoG Team
